FOR IMMEDIATE RELEASE

PREFERRED FREEZER SERVICES FOCUSES ON CHINA

Chatham, New Jersey (May 11, 2011) – Preferred Freezer Services, a leader in temperature-controlled warehousing, is committed to addressing the rapidly changing consumption trends throughout China. As stated in the March 11, 2011 report from McKinsey Global Institute, nine of the ten urban areas that will experience the highest GDP growth from 2007 to 2025 are in China.

Given China's forecasted economic growth figures, there is an increasing demand for safe handling and overall higher food quality. This includes both the import and export of prepared and frozen convenience foods. John J. Galiher, President and CEO of Preferred Freezer Services, has identified the real need for continued expansion of modern, energy-efficient and safe, temperature-controlled warehouses within China.

Preferred Freezer Services expansion plan has commenced the planning and development of fourteen (14) locations within China. Those targeted cities include Beijing, Tianjin, Shenzhen and Shanghai. Currently, two fully-automated facilities in Shanghai totaling over 44,700 square meters are near completion in Lingang Logistics Park and Wai Gao Qiao. For over twenty years, Preferred Freezer Services has been specializing in designing, building and operating state-of-the-art temperature controlled warehouses; the company has been clearly defined throughout the industry as "Best of Class" in facility design, operating metrics, and superior customer service.

Tim McLellan, Managing Director of International Business Development, adds, "The Shanghai Lingang facility will open in the third quarter of 2011. Preferred Freezer Services is very proud to set a higher standard for temperature-controlled warehouses in China and to be able to participate in the development of China's cold chain supply and logistics industry. Current PFS customers in the U.S. who value our business model are delighted to know they can expand into China and receive the same dedicated first-class service and premium quality cold chain solutions to fulfill their China business needs. Even more important, are the domestic Chinese companies who understand Preferred Freezer Services commitment to building and managing state-of-the-art temperature-

controlled warehouses and how valuable our model will be to helping China meet its demands for properly-handled food products.”

For more information on the China facilities, contact Tim McLellan, Managing Director of International Business Development at +86 139 1755 5748 or tmclellan@pfsi.com.

For more information on all North American facilities, please visit
